— and make
your own observations

To many men in the Profession, results from the use of Lavoris in cases of Spongy and Tender Gums are an old story. The gratitude of patients leaves no doubt about Lavoris having real therapeutic value and the fact that it is pleasant adds to their enthusiasm.

Try it, Doctor, on a few cases and make your own observations.
Samples sent on request only.

When Dentists "talk shop"

It's a live topic among dentists today
...this subject of local anesthetics.

And, more and more are finding that Novocain with Cobefrin...used in exodontia, for cavity-preparation, for cases where extra precautions must particularly be taken against shock and after-complications... is a builder of patient confidence upon which rests every successful dental practice.

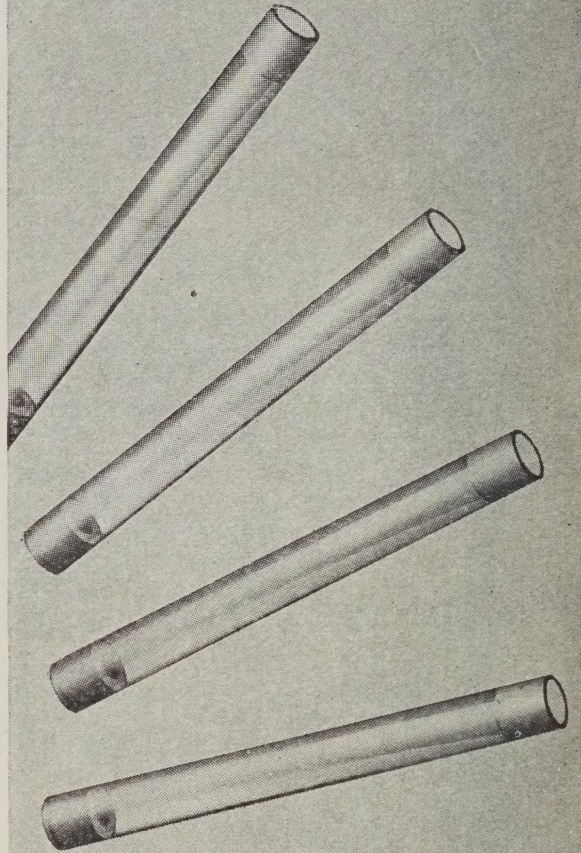

Order a supply from your dealer. Available in either Carpule or R. B. Waite cartridges and ampules, boxes of 10, 100 and Special Alkalinizing Packages which offer you the safest and most convenient means of alkalinizing a cartridge of Novocain-Cobefrin at time of injection—the only practical means of using Alkalinized Solutions.

FIFTEENTH SEASON

VOLUME FOUR

DR. HARVEY W. REID
PRESIDENT

PRESIDENT'S MESSAGE

To the Dentists of Greater Toronto

Time marches on — Your Executive Council presents for your approval the fourth edition of the Bulletin. In its pages you will find reports of last year's activities and an outline of this year's program. Many hours have been spent by the members of the several committees in preparing the program, arranging the various activities and preparing material for this edition; to each I would like to express my sincere thanks. May I ask that you in return peruse well the pages that follow.

A most generous response to the questionnaire sent out in May was received and in formulating the program an earnest endeavour has been made to comply with your wishes as expressed. How far we have been successful will be judged by your attendance.

I heard an Australian say that in his country they drove on the left side of the road; in this country in the middle. An American humorist said there were two sides of the road the right side and suicide. I believe this equally true of the practice of dentistry: the middle road is dangerous, the right side is the one of advancement, of study, of exchange of ideas: the other of isolation and practice in the same old manner and just as surely, I believe, professional suicide.

The practice of our profession makes many and varied demands upon us, and it is so easy to procrastinate. Our good resolutions to keep well abreast of the advances in practice are so easily broken. May I respectfully request you to study the program outlined and decide to become a member this year. You will be afforded a most cordial welcome.

HARVEY W. REID.

ROUND-END BRISTLE STAYS ROUND!

Ordinary Bristle Gets More Jagged with Use—

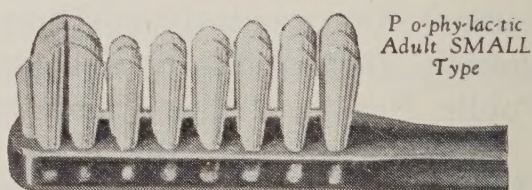

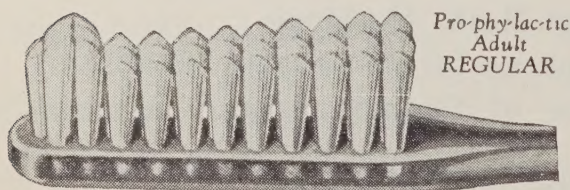

To answer dentists who asked: "What happens to your Round-End bristles after the brush is in use for a month or two?" we made the microscope photographs above.

Note that the **Pro-phy-lac-tic** bristles are *still* round and smooth as fingertips after months of brushing. But note especially how the ordinary bristles, typical of those in all other tooth brushes, grow more ragged and split in service. Certainly, not the kind of bristle you would recommend for gum massage.

The one and only line of tooth brushes which offers patented Round-End bristles is **Pro-phy-lac-tic**

Pro-phy-lac-tic Brush Co.

PATIENTS ARE PEOPLE

The successful dentist considers his practice as people first and patients only in relation to their actual dental treatment. This is common sense.

People never visit their dentist in a casual frame of mind. Whatever their dental requirements may be they do not approach the occasion nonchalantly — rather are they hypersensitive to their surroundings and extremely appreciative of an atmosphere that breeds confidence.

As a modern dental surgeon you require a modern setting. So, too, do the people who are your patients. Modern furnishings, precision instruments and high quality working materials all combine to create a favourable impression that contributes in building a lasting practice among people who desire an agreeable atmosphere, just as you do yourself.

Ash-Temple's complete organization offers everything you may require in new installations or supplies. A postcard or phone call to the nearest Ash-Temple Branch will place the services of an experienced representative at your disposal.

FOREWORD—PROGRAMME COMMITTEE

With a view to providing a programme which would meet with the approval of the majority, a suggestion was made to the Academy Council that a questionnaire be sent to the Fellows of the Academy this year. The idea received the approval of the members of the Council and accordingly was sent out on May 1st. The response has been very gratifying indeed, over 38% of the questionnaires being returned within the allotted time. The opinion has been expressed by statisticians that this percentage of returns to a questionnaire is unusually high, and indicates the active interest taken by each Fellow in Academy affairs. The replies have been most helpful to the Committee in formulating this year's programme, and while it has been impossible to act upon all the suggestions, some of these have received consideration and are incorporated in the programme for this season. In addition, many helpful and valuable suggestions have been tabulated for the guidance of future Programme Committees.

The questionnaire listed a number of subjects from which each Fellow was asked to select, in order of preference, his choice for this year's programme. The tabulated results are as follows:

- 1.—Full Dentures
- 2.—Dentistry For Children
- 3.—Partial Dentures
- 4.—Preventive Dentistry
- 5.—Radiography
- 6.—Gold Inlays
- 7.—Patient Education
- 8.—Oral Surgery
- 9.—Periodontia
- 10.—Orthodontia
- 11.—Ceramics and Conduction Anesthesia

Favourable comment might be made on the high position which "Dentistry for Children" occupies on the list. This would seem to be an indication of a desire upon the part of the Fellows of the Academy to emphasize practical prevention, as well as a realization of the worth of children as practice-builders.

To the question of the opening dinner, the consensus of opinion was strongly in favour of a speaker on a subject of general interest rather than a dental or other professional subject. Last year's 'Good Fellowship' Night appears to have been pre-eminently successful, the majority of the Fellows being in favour of repeating this event again this year.

Regarding the question as to how the district societies might function better as components of the Academy, a number of excellent suggestions were received. Without enumerating them individually, the trend would appear to be towards closer co-operation between the executives of the district societies and the Academy Council, both in regard to programmes so as to avoid repetition, and in regard to dates of meetings so that there will be no overlapping. These suggestions have received the careful consideration of the Executive Council, and many of them will be acted upon.

Over 85% of those who returned questionnaires indicated that they are definitely in favour of continuing the study groups as heretofore. The many excellent suggestions received by the Academy Council through the questionnaire, and the intense interest that has been demonstrated by the Fellows of the Academy are an encouragement to the members of the Executive Council.

Perhaps the outstanding result, however, was revealed in the answers to the question asking for any other suggestions than those enumerated on the questionnaire. There was a definite opinion expressed that future programmes of the Academy should include subjects of greater professional interest with less emphasis upon the purely technical phases of practice. In order to clarify the meaning, an enumeration of some of the subjects suggested may be helpful.

- Vitamin Therapy
- Dental Caries—New Theories on Cause and Control
- Oral Manifestations of Disease
- Oral Diagnosis
- Law for the Dentist
- Economics
- Calcium Metabolism

BOARD OF CONTROL

I appreciate greatly the assistance I received from the dentists of Toronto in the campaign of last year. I will again be a candidate for a place on the Board of Control and trust that my record has been such as to merit continued support.

FRED J. CONBOY

Evidence is being accumulated to show that the profession has reached a stage in its development which necessitates that each member becomes familiar with these allied subjects. With this in mind the Programme Committee was unanimous in adopting the following policy which was of course also endorsed by the Executive Council.

PROGRAMME POLICY

1. To set as an objective for the next five years the gradual development of an Academy Programme for the stated meetings which would include the broader aspects of dental practice rather than emphasize the purely mechanical phases, and that this year at least, one meeting be devoted to a consideration of a fundamental subject.
2. To make the Academy Programme so attractive this year that in the interest of self-preservation, members of the dental profession cannot afford to stay out.
3. In deference to the concensus of opinions as expressed in the replies to the questionnaire, that the papers this year should include the following subjects:
 - (a) Dentures
 - (b) Preventive Dentistry and Dentistry for Children—(Radiography)
 - (c) Restorations
 and that the best men obtainable be invited to present these subjects.
4. To prepare a definite programme of publicity for Academy activities.
5. To sponsor intensive study courses by outstanding clinicians at suitable times during the year, limited to Fellows of the Academy.
6. To continue extended study groups as heretofore.
7. To broaden considerably clinic night, encouraging the active participation of all groups affiliated with the Academy of Dentistry.
8. To enlist the active co-operation of each group interested in any particular meeting.

Careful perusal of the synopsis of the programme which follows will indicate to the Academy Fellowship that the programme has been formulated only after careful study of the tabulated results of the Questionnaire. The majority of the subjects included are those which were preferred by the Academy Fellowship. The essayists are men of outstanding ability in their particular sphere.

Particular emphasis should be given three innovations on this year's programme. One is the holding of an intensified course in full dentures to be conducted by Dr. Charles Tuller of New Orleans on Thursday, and Friday, November 18-19th. The course will be limited to the Fellows of the Academy of Dentistry, Toronto, the Hamilton Dental Association and the London Dental Society. Another innovation is the holding of a Winter Clinic extending a full day and evening. This will be held on December 8th. Guest clinicians, group clinics, individual table clinics, and manufacturers' demonstrations will be featured on the programme for the Winter Clinic.

The third innovation in this year's programme is the joint meeting with the Fellows of the Academy of Medicine. The subjects chosen are of exceptional interest to the members of both professions. Because of the value of such a joint session in furthering the excellent co-operation which exists between the professions, this is a meeting which every Fellow of the Academy will strive to attend. This meeting fulfils the first objective of the programme policy previously mentioned. It is hoped that subjects embracing the broader aspects of dental practice will also be included in future Academy programmes.

Altogether the programme is one that every member of the Dental profession in Toronto or vicinity cannot afford to miss. Dentists are individualists and are therefore apt to become narrow in their views. The opportunity for contact with other professional men is presented through the Academy of Dentistry. You will be broadened professionally by active participation in this organized body of Toronto dentists.

GOOD FELLOWSHIP NIGHT

Casa Loma

Friday, October 8, 1937

We all remember the wonderful “Get Together” which was arranged for us at the Hunt Club last year.

It is going to be difficult to equal, but Harold Hoag has some wonderful ideas for Friday, October 8, at 6.30. First “Good Fellowship”—dinner at 7.00—later, entertainment and a Bridge Tournament.

Harold has many plans up his sleeve which he is keeping secret, so be sure to mark off the evening of Friday, October 8, from 6.30 on, for our “Get Together” at Casa Loma.

FORCEPS and other jointed instruments of your own design or duplicates of your pet forms can now be made in Canada of Sheffield stainless steel.

Your own loose-jointed, worn-beak and rusted forceps, etc., can be repaired and chrome plated at small cost.

This work is done by expert Sheffield forcep makers of over 30 years' experience.

Another Denco service which is being greatly appreciated by our friends.

MERLE W. THORPE

Washington, D.C.

Editor and Publisher "Nation's Business"

"WHAT LIES AHEAD FOR BUSINESS AND THE HEALTH PROFESSIONS"

Merle Thorpe is recognized as one of the country's foremost speakers and writers on business subjects. As editor of the nation's leading business magazine, he is in a position at Washington to keep clearly informed regarding business trends and especially regarding legislation affecting business. He therefore is in great demand as a speaker, having spoken in every large city in the United States.

Nation's Business Magazine, of which Mr. Thorpe is the editor, is published by the Chamber of Commerce of the United States. To-day it has more than 275,000 subscribers, including the leading business executives of the country.

Mr. Thorpe, in addition to being a director of a number of American corporations, is also a director of "The Central Dispensary and Emergency Hospital" and a Trustee of "George Washington University". Through these affiliations he has taken a great interest in health maintenance and the health professions.

DR. CHARLES SHEPARD TULLER
New Orleans, La.

**THE FOURNET-TULLER APPLICATION OF NEW MECHANICAL
PRINCIPLES TO PRODUCE FULL LOWER DENTURES SUR-
PASSING IN STABILITY THE BEST MODERN UPPER
DENTURES**

Discovered by Sidney C. Fournet, D.D.S.
New Orleans, La.

Presented by Charles Shepard Tuller, D.D.S.
New Orleans, La.

Dr. Tuller was born in Chicago and graduated from the Chicago College in 1901. He has on two occasions served as president of the Louisiana State Dental Society. He taught dentistry for seven years, part of which time he was Professor of Prosthetic Dentistry. He is the author of many papers and essays and has appeared on numerous State programmes.

What is believed in many parts of the Country to be the most efficient manner of stabilizing full lower dentures will be described in detail by Dr. Charles Shepard Tuller. He will discuss the methods employed and the anatomic background for securing complete stabilization of full lower dentures. Material to be covered will deal with a wide field of contributing factors which include errors of design and construction, preliminary and final impressions, compression of tissues and distribution of stress, degree of bite opening, and various other factors. In the end, he leaves his audience with a new conception of lower denture stability.

Drs. Fournet and Tuller have collaborated to present this subject to the profession by script, motion picture, slides, casts, and anatomic specimens.

TWO-DAY STUDY COURSE IN FULL DENTURES

by

CHARLES SHEPARD TULLER, D.D.S.

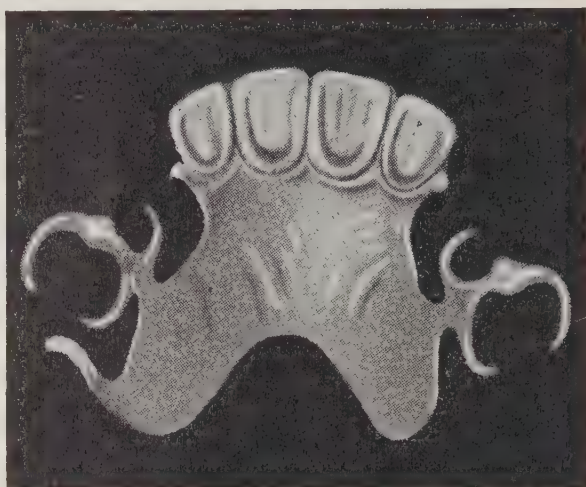

Thursday, November 18th—Friday, November 19th

Stationary artificial dentures based on the science of to-day began with the work of such men as Hall, Tench, Clapp upwards of twenty years ago. By both these techniques startling improvements in denture retention were achieved but results were not uniform, nor was complete and lasting stability accomplished in all cases. Uncertainty as to result and frequent failures led to a search for an underlying principle applicable to all cases and promising uniform results. This principle proved to be Horizontal Stability and with this as a basis it became possible to improve both adhesion and atmospheric seal to a point where with the Fournet-Tuller Full Denture Impression Technique practically stationary dentures are now uniformly produced. Doubt has gone and certainty has taken its place.

This technique was first presented before the Louisiana State Dental Society in April, 1935 and again in November, 1935 before the American Dental Association in New Orleans. As a result of these presentations there have been received and accepted invitations from the St. Louis Dental Society, and the Cincinnati Dental Society, and from the following State Societies: Alabama, Texas, Oklahoma, Ohio, Minnesota, Indiana, Illinois and New York.

The cost of this course, which is limited to the Fellows of the Academy, will be covered by a special fee, to be announced along with the other details at a later date.

SECOND STATED MEETING
Joint Session with Academy of Medicine

Osler Hall

Academy of Medicine Bldg.

Wednesday, January 12th, 1938

CHARLES W. HAIR, M.D., C.M.
President, Academy of Medicine, Toronto

The courtesy of the Executive of The Academy of Medicine in providing from year to year a suitable place of meeting for the Fellows of The Academy of Dentistry is much appreciated. This year, our medical confreres are furthering this splendid co-operation in studying with us in this joint session, some problems of mutual interest. Qualified representatives from each profession will discuss the medical and dental viewpoints regarding the various subjects. There will be a short general discussion following which refreshments will be served. As this will be a meeting of exceptional interest, all Fellows are urged to be present. The following are the subjects for consideration:

What effect does pregnancy have on the dental tissues, and what advice and care should be given to the expectant mother to protect her dental health and promote normal development of the teeth of her child?

Are there changes in the care and diet of the mother after the birth of the baby and during lactation period?

What factors influence the growth, development and structure of the dental mechanism?

What bearing has development and structure on future susceptibility to dental disease?

What report should a dentist expect from a physician?

What report should a physician expect from a dentist?

What is the dentist's responsibility in regard to his patient's nutrition?

What dental conditions influence mental health?

What effect upon general health have dental and peridental lesions?

"COW & GATE CHOCOLATE MILK"

NATURE'S TONIC BEVERAGE EVERYONE LOVES IT!

Cow & Gate Chocolate Milk is a blend of specially chosen chocolate milk powder, dextrinized and predigested wheat flour and tasteless codliver oil concentrate. There is also present an optimum quality of sucrose. The milk powder is obtained from the famous St. Lawrence Valley pastures, famous for their richness and the purity and vitamin content of the milk produced. It is prepared by a special Cow & Gate process under the same highly hygienic and scientific system of controls which particularly distinguishes the preparation of all Cow & Gate products. In addition to the natural and rich vitamin content of the original milk, the nutritive value has been enhanced by the incorporation of the natural tasteless cod-liver oil concentrate, rich in vitamins "A" (anti-infection) and "D" (anti-rachitic). The process also greatly increases the digestibility of each of the ingredients and renders the food particularly suitable for the various idiosyncrasies of diet.

PRENATALAC

"THE ANTENATAL AND POSTNATAL MILK FOOD"

PRENATALAC has been prepared in order to meet what has now come to be regarded by the highest medical authorities as an essential need in the diets of pregnant and lactating women. It is prepared from rich St. Lawrence Valley Full Cream Milk which is known to be a rich source of calcium and phosphorous salts, and has been modified by the addition of Iron Ammonium Citrate to the extent of 63 grains per pound ($10\frac{1}{2}$ grains per pint) and fortified by the addition of a natural cod-liver oil vitamin concentrate equivalent to 250 International Vitamin D Units and 2,000 International Vitamin A Units per pint of reconstituted food.

Feeding tests have demonstrated that the food is well tolerated by mothers, and that in addition to its palatability it is comparatively free from any constipating effects.

PAST PRESIDENTS' AND FRATERNAL NIGHT

Osler Hall

Academy of Medicine Bldg.

JOHN G. COGGAN, D.D.S.
Detroit, Mich.

"AMALGAM RESTORATIONS"

The replies to the Academy questionnaire indicate that the largest percentage of time given to any one phase of practice is given to the insertion of amalgam restorations. As director of the Plastic Section of the Detroit Clinic Club, Dr. Coggan has made a thorough and scientific study of this subject and is therefore well qualified to address us on this important phase of Dental practice.

Dr. Coggan graduated from the University of Michigan Mechanical Engineering School in 1922, and the University of Michigan Dental School in 1930. For the next four years he instructed in General Operative Dentistry and Crown and Bridge Prosthesis at the University of Michigan Dental School. The next three years Dr. Coggan spent at the Henry Ford Hospital—Department of Dentistry—where he is at the present time. He is a member of the American Dental Association, the Michigan State Dental Society, and the Northwestern Dental Club.

New York

"THE MODERN PROGRAMME FOR PREVENTION OF DENTAL DISEASE"

The dental profession has for years emphasized the early care of the six-year molar as the foundation stone of preventive dentistry. In recent years the care of the deciduous dentition has been recognized as having an equally important part in preventive dentistry. The logical development of this movement now brings us to the subject of prenatal care in which the nutritional programme plays an increasingly important part. The modern programme for preventing dental disease starts with the expectant mother, includes both general and local protective measures for the infant and pre-school child and involves a consideration of the health of both the teeth and periodontal structures. This paper will present accepted local measures as well as recent developments in the biochemistry of the body as it relates to the teeth.

THIRD STATED MEETING**Osler Hall****Academy of Medicine Bldg.****Thursday, March 29th, 1938**

W. N. MILLER, D.D.S.
Flint, Mich.

**"THE PSYCHOLOGICAL APPROACH TO
DENTAL OFFICE PROBLEMS"**

Dr. Miller has been appearing before National and State Society Meetings for fifteen years. He is at present president of the Genesee County Dental Society. Dr. Miller made a survey of the Methods of Teaching of Office Practice in American Dental Schools and has original and definite ideas. As he has proven his ability to discuss this subject sanely and fearlessly, his presentation will be looked forward to with keen anticipation.

CAN YOUR PRACTICE BE INCREASED?

By

Caring for pre-school children?
Maintaining the mouths of 'teen age children?
Rendering more service to employees of Industry?

Or by

Public radio addresses on dental care?
Dental lectures to lay audiences?
Closer co-operation with the medical profession?

Or by

Better quality of your own services?

The Survey.

The public know the importance of a healthy mouth. The survey sponsored last Spring by The Public Dental Health Committee of The Academy of Dentistry also discloses that the layman's appreciation of the value of dentistry for children is greater than that of some members of our own profession. Will you read carefully our report in the September, 1937 issue of the Journal of The Canadian Dental Association? The facts may surprise you.

Industry.

Is it in our interests that a sound plan to provide dental health service to the industrial workers be inaugurated? Industry is spending good money for protection to the legal and medical professions—why not to dentistry? Any service rendered must be very carefully planned and controlled, and to insure success full co-operation must be given by all in the profession.

Education.

(a) The Public—Radio broadcasts will further the avenues already used in public dental education. Material carefully prepared will be broadcast throughout the year—Will you co-operate by telling your patients? The Department of Health has given excellent co-operation and further details of their help to the private practitioner will reach you by mail.

(b) The professions—Perhaps the dentist could render a more adequate service if he presented the value of dental service as a health measure to his patients. The present status of dentistry for children could be improved. Maybe you think you are too busy or too tired to take a Study Course. There is still room for better physician-dentist relationship. See Joint Meeting with Academy of Medicine, Jan. 12, 1938, full details on page 27.

Dentistry for Children.

A knowledge of actual conditions in the mouths of secondary pupils might be surprising. Should not accurate information regarding these conditions be the property of the dental profession? A survey would reveal such conditions.

Hospital Dental Service.

1. What constitutes adequate hospital dental service?
2. What type of dental service should be rendered in such institutions?
3. Should the services be limited to the removal of oral foci of infection?
4. Should restorative services be limited to those patients whose maintenance of health definitely depends upon masticatory efficiency?

These are questions relevant to hospital dental service. Your assistance in answering them is invited.

Dental Examinations.

How much more complete could they be

- (a) in private practice.
- (b) in clinics.
- (c) in physical examinations of teachers, employees and insurance policy applicants and owners?

Your chairman solicits your support in the work and would welcome your co-operation, counsel, or criticism for the benefit of the profession. Will you lend a hand?

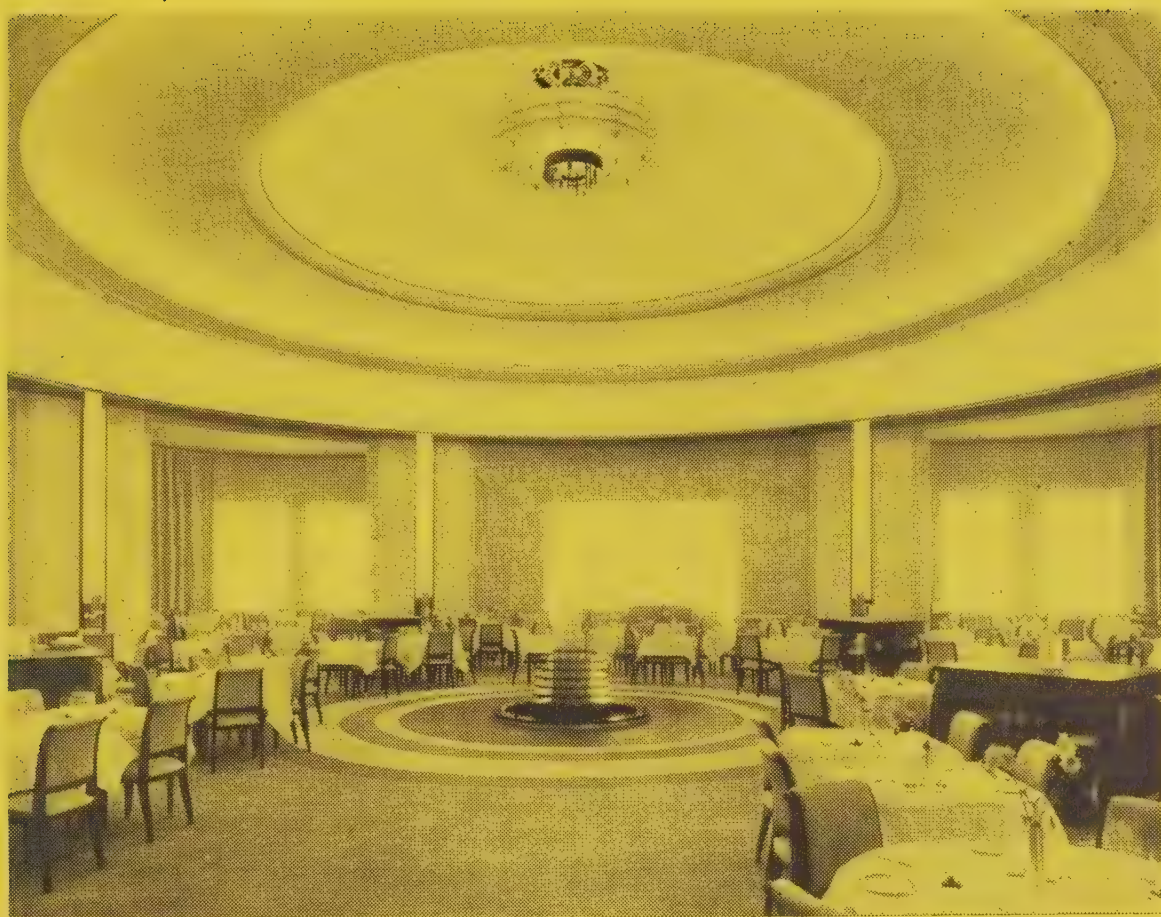

A. E. HIGGINS, Chairman

Public Dental Health Committee.

W. M. TWIBLE, Secretary

"Everything we can do for our profession falls far short of paying the debt we honestly owe to it."

—Edmund Noyes.

EATON'S ROUND ROOM

FOR PARTIES, DINNERS, BANQUETS OF UNQUALIFIED SUCCESS!

Round Room banquet service is outstanding in Toronto! Each course served with deft precision... menus carefully planned... food deliciously cooked. Surroundings are inviting and harmonious — the foyer makes a convenient rendezvous for before and after dinner.

Parking and checking services with no extra charge. Telephone Adelaide 5011, Social Director's Office.

STUDY GROUP SECTIONS

Study groups will again be an important factor in the activities of the Academy. This year, to save the delay and confusion in organizing, your committee has decided to choose the clinicians for the various groups. Their names, along with an outline of the courses, follow below. It is hoped that this more definite understanding of what to expect from a study course will be appreciated by the men contemplating taking them.

As in the past, the procedure for the formation of a study group is as follows:

- (1) Ten or more members are required to form a group.
- (2) A fee of \$5.00 is payable to the Treasurer of the Academy on the formation of the group.
- (3) All clinicians must be acceptable to the Academy Council.
- (4) Each member of a group must be a member of the Academy.
- (5) Each group shall elect a Chairman and a Secretary.

FULL DENTURES

Clinician—DR. J. A. BOTHWELL

This course will embrace lectures on practical procedure in full denture construction and rebasing technique, simultaneously with the construction of a Full Upper and Full Lower Denture for a patient and the rebasing of a pair of dentures.

PERIODONTOLOGY

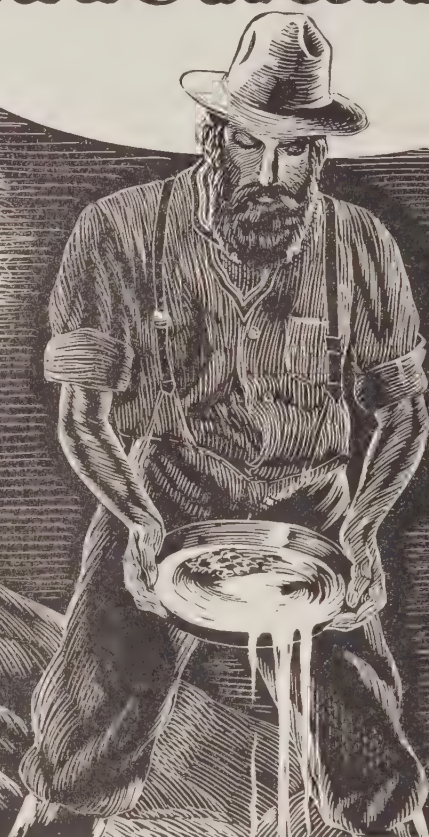

Clinician—DR. CHARLES H. M. WILLIAMS

The plan of the course for this group is based on a desire to teach simple and practical procedures in the examination and treatment of the most frequently encountered periodontal lesions. The meetings will consist therefore of a series of demonstration clinics on patients under treatment. Didactic instruction is reduced to a minimum.

The main topics will be as follows:

1. Examination—diagnosis and choice of method of treatment.
2. Scaling—calculus formation, types of scalers, sharpening, techniques of application.
3. Occlusion—classification, technical procedures of correction including demonstration of correction by grinding.
4. Pocket Surgery—methods available and demonstration of the application of each.
5. Oral Hygiene—choice of instruments and materials and demonstrations of instruction of patient.
6. Necrotic Gingivitis (Trench Mouth)—Newer methods of Treatment.

Williams "Klondiker"

A NEW VERSATILE INLAY GOLD *designed for* ALL-AROUND USE

Williams "Klondiker" ushers in a new era of inlay gold. For, now, instead of puzzling over which gold to use, you simply say "Klondiker". Its broad scope of adaptability... attractive rich gold color... its ease of casting and sharp margins—all combine to make Williams "Klondiker" *the* inlay gold to standardize on. Ideal for M. O.'s, M. O. D.'s, D. O.'s $\frac{3}{4}$ crowns, abutments, etc. Meets A. D. A. specification No. 5, type C. And the price: only \$1.90 per dwt. Ask your dealer or write Williams Gold Refining Co., Buffalo, N. Y.; San Francisco, Calif.; Fort Erie, N., Ont.

Williams

The general plan of procedure is to accept typical cases for treatment and to observe the response resulting from the procedures employed from week to week throughout the duration of the course.

ORAL SURGERY

Clinician—DR. J. H. JOHNSON

This course is planned to be of aid to the general practitioner, and will combine lectures, and actual operating with patients. Some topics to be as follows:

1. Pre-extraction examination and records.
2. Choice of anaesthetics.
3. Choice of instruments.
4. Extraction of ordinary teeth.
5. Extraction of unusual teeth.
6. Trimming ridges and preparatory to insertion of dentures, and any other minor surgical operation within the scope of the general practitioner.
7. Post-operative treatment.

CHILDREN'S DENTISTRY

Clinician—DR. S. MacGREGOR

As the best practices have been built by catering to children, the general practitioner and particularly the younger man should be interested in this course.

The high lights will be:

1. Study of child psychology.
2. Handling the average child.
3. Handling the difficult child.
4. Parent and child education.
5. Examination of mouth.
6. Choice of filling material.
7. Cavity preparation and insertion of fillings.
8. Discussion of extraction for children (by an exodontist).

CHAIRSIDE PSYCHOLOGY

Organizer—DR. LLOYD STERLING

This group had the largest membership and was highly successful last year. The members contributed a large part of the material presented. It is hoped they will organize along the same line again this year.

DON GALLIE STUDY GROUP

This group did not function last year, but it is hoped that it will now resume study.

PREVENTIVE DENTISTRY

Organizer—Dr. Tom Marsh

As this is such a broad subject, it was thought best to conduct the study in the same manner as last year, that is, for the men to select leaders in the various branches to give papers pertaining to their particular Specialties, such as, prophylaxis, diet, orthodontia, operative etc.

ORAL DIAGNOSIS STUDY GROUP

This group has had a closed membership for several years, and it has been suggested that others desiring to enter this broad field of study should enroll in a second Oral Diagnosis group and use as a basis for study this year Dr. Miller's recent book "Oral Diagnosis and Treatment Planning". Ten meetings can be arranged as follows:

1. Chapter II—head pain—R. J. Behn M.D.
2. Chapter III—pain of dental origin—J. O. McCall—A.B., D.D.S.
3. Chapter IV—Mouth conditions in children—I. N. Kugelmass, M.D., Ph.D., Sc.D.
4. Chapter V—Dental diseases in children—J. O. McCall, A.B., D.D.S.
5. Chapter VI—Diseases of Oral Mucosa, Exclusive of the Neoplasms—G. M. MacKee, M.D., and A. C. Cipollaro, M.D.
6. Chapter VII—Radiographic Interpretation—A. L. Greenfield, D.D.S.
7. Chapters XI and XII—Periodontal disease—S. C. Miller, D.D.S.
8. Chapter XIII—Caries, its Detection and Diagnosis—A. Walker, D.D.S.
9. Chapter XVI—Diagnosis for Bridgework and Bridge Design—K. J. Knapp, D.D.S.
10. Chapter XX—Tumors of the Oral Mucous Membrane, G. M. MacKee, M.D. and A. C. Cipollaro, M.D.

Clinicians or lectures who are specialists in one of the foregoing subjects could be each asked to lead discussion on the chapter pertaining to his subject.

STUDY COURSE IN ORTHODONTICS

Clinician—Dr. G. Vernon Fisk

Objectives

To understand growth and development of the organ of mastication.

To appreciate the effects of normal occlusion in contrast with malocclusion on oral health and general health.

To recognize incipient malocclusion—7 diagnostic signs.

To approach the treatment of cases recognizing biologic as well as personal limitations.

Most modern methods of correcting common child habits associated with malocclusion.

Use of appliances in assisting normal growth and development where a tendency to malocclusion is present.

An understanding of the appropriate ages for treatment of various types of malocclusion.

An understanding of the scope of simple appliances and their construction.

An appreciation of the value of orthodontic service for children in preserving the health and function of the teeth, as well as developing facial harmony. Patient and parent education with these points in mind.

OPERATIVE DENTISTRY

Clinician—Dr. R. D. Thornton

- I Relative merits of different materials for operative restorations.
 - (a) Amalgam
 - (b) Synthetic porcelain and cements
 - (c) Gutta Percha
 - (d) Gold Foil
 - (e) Gold Inlays
 - (f) Porcelain Inlays
 - (g) Gold crowns
 - (h) Porcelain crowns
 - (i) Combinations
- II Amalgam Restorations
 - (a) Their advantages and disadvantages, indications and contra-indications
 - (b) Cavity preparations
 - (c) Exclusion of moisture
 - (d) Use of matrix bands
 - (e) Manipulation of materials
 - (f) Condensation of material
 - (g) Contouring and finishing
- III Other plastic materials, foils, inlays, and crowns will be dealt with similarly.
- IV Pulp—its care and treatment.

PUBLIC SPEAKING

Prof. G. A. McMullen

Every member who has taken this course, whether from the standpoint of general education or for the purpose of training for actual platform work, is most enthusiastic over the personality and teaching ability of Prof. McMullen.

The lessons comprise ten two hour sessions in which each member is required to speak on either Dental, Current, or impromptu subjects. Theory and actual practice are ideally blended.

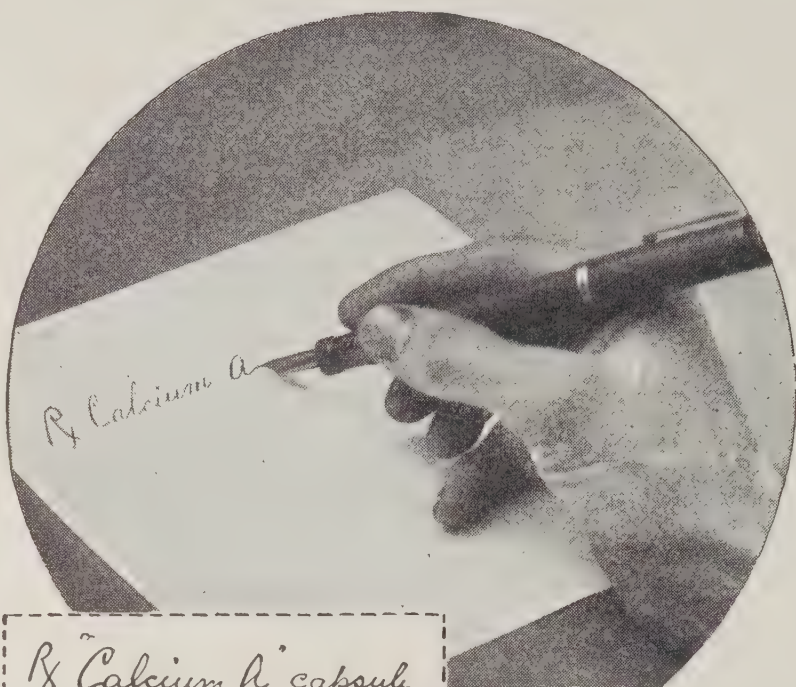

Some of the highlights are:

1. Correct breathing and posture.
2. Exercises.
3. Voice tone, pitch, and control.
4. Actual speaking in class.
5. Introducing speaker, parliamentary procedure, etc.

It is urged that Academy members desirous of taking study courses intimate their intentions early.

If the required number for any group do not apply, that particular course will not be given.

Chairman of Study Groups.....Victor H. Large

R Calcium A capsule
(Ayerst) No 280
Mills 100
Sig. One or two capsules
three times daily
15 minutes before food

"Calcium A" provides a medium for mineral-vitamin therapy that is as simple in its administration as it is valuable in its therapeutic application.

"Calcium A" is indicated as a dietary supplement in pregnancy and lactation, tubercular conditions, convalescence, or in any condition where additional calcium and phosphorus is desirable. Each "Calcium A" capsule contains approximately 70 milligrams of organically combined calcium and phosphorus in association with a standardized concentrate of defatted cod liver oil. Each capsule exhibits the complete vitamin A and D value of one teaspoonful of cod liver oil*, thus ensuring a more effective calcium-phosphorus utilization.

**Conforming with requirements
of the U.S.P. XI.*

TORONTO EAST DENTAL ASSOCIATION

DR. L. M. GROSE
President

The Toronto East Dental Association, oldest of the district dental organizations, begins its eleventh year of monthly meetings, with the opening dinner at the Club Esquire, Monday, November 1st at 6.15.

The Annual Fall Golf Tournament will be held at Cedarbrae Golf Club on Wednesday, September 22nd, with the usual interesting entertainment provided.

A hearty invitation is extended to all dentists east of the Don to join with us, one evening each month and the Executive would appreciate any suggestions re 1937-38 programme.

Tentative dates for the regular monthly meetings, which will be held in the Toronto East General Hospital are, December 2nd, January 17th, February 22nd, March 14th.

On behalf of our Association, may I take this opportunity of extending to the Academy and the local societies best wishes for a successful season.

President	L. M. Grose
Past President	R. R. Butler
Vice President	Helen Manchester
Secretary	Alex MacKay
Treasurer	Jack Shaunessy
Golf Chairman	Leon Hipwell
Councillor to Academy	R. W. Hoffman
Committee	Fred Loucks
	W. W. Weir
	S. Hopkins

ASSOCIATION OF DOWNTOWN DENTISTS

DR. HAROLD SWALES

President

A successful season is anticipated by the Association of Downtown Dentists under the capable leadership of the following executive:

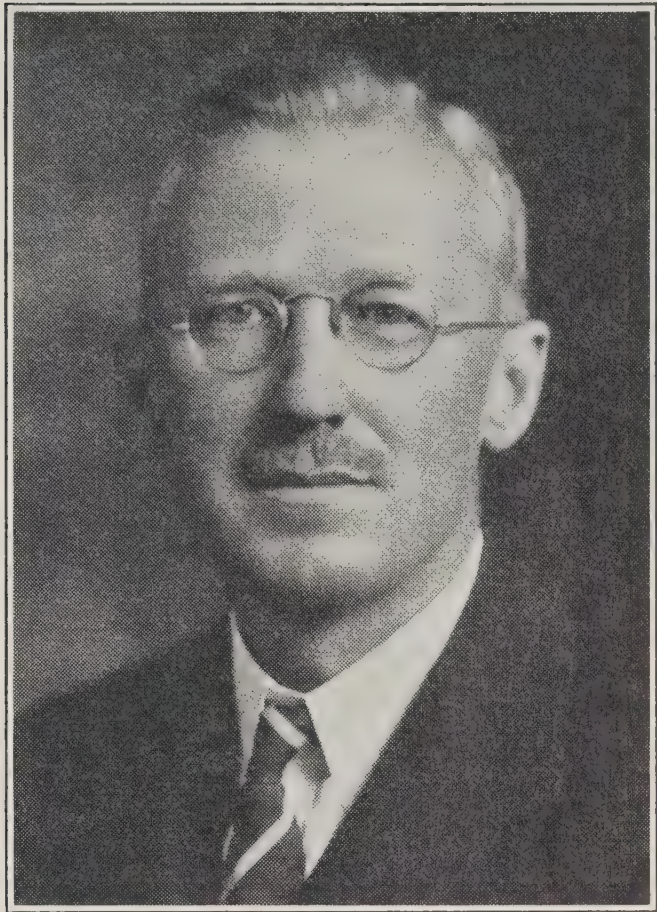

Meetings are being arranged as follows:

Good Fellowship	September 29th
1st Stated Meeting	November 3rd
2nd Stated Meeting	December 1st
Christmas Bowling	
3rd Stated Meeting	January 19th
4th Stated Meeting	February 16th
Election of Officers	March 16th

OFFICERS FOR THE SEASON 1937-38

Hon. President	Dr. A. D. A. Mason
President	Dr. H. A. Swales
Vice President	Dr. B. R. Gardiner
Secretary	Dr. Cameron Adams
Treasurer	Dr. W. H. Walton-Ball
Housing Committee	Dr. Eddie Sinclair
Membership Committee	Dr. Archie Babcock
Programme Committee	Dr. Wendell Holmes
	Dr. J. C. Fullerton
Councillor to Academy	Dr. Harry Hobbs

TORONTO CENTRAL DENTAL SOCIETY

DR. BROCK WALKER
President

The Executive feel they are presenting a variety of interesting subjects, to the Society this season and we look for your continued support of your local organization.

PROGRAMME

- October 14th—Mr. Sanderson, Chief Librarian.
- November 11th—Our genial Past President, Dr. Bill Trelford has arranged to have Mr. Gilchrist, an eminent scientist speak to us.
- February 17th—An evening at “The Art Gallery” under the direction of the Staff.
- March 10th—A prominent Naturalist will be our speaker.

OFFICERS FOR SEASON 1937-1938

Past President	W. G. Trelford
President	Brock Walker
President Elect	Roy Hendry
Secretary	Gordon Knapp
Treasurer	A. O. Derbyshire
Councillors	P. Harrington
	J. G. Perkin
	L. Drewbrook
Councillor to Academy	G. V. Fisk

NORTH TORONTO DENTAL SOCIETY

DR. S. A. MCGREGOR
President

The following is the outline of the programme of meetings for the current season to be held at the Patricia Tea Rooms, Yonge and Heath Sts.

- First Meeting—October 18th
Oral Surgery—Dr. W. J. Kerr.
- Second Meeting—November 29th
Illustrated Lecture—Count N. Ignatieff.
- Third Meeting—January 17th
Effect of Glandular Disturbance on Teeth and Jaw Development—
Dr. Tisdale and Dr. Fisk.
- Fourth Meeting—February 21st
Radiography—Dr. George Morgan.
- Fifth Meeting—March 21st
Dinner Meeting.

OFFICERS FOR THE SEASON OF 1937-38

President	S. A. McGregor
Past President	E. M. Honey
Vice-President	M. L. Laidlaw
Secretary	R. E. Martin
Treasurer	R. Bennett
Councillors	H. M. Sanderson
	G. W. Johnston
	S. A. Milburn
	C. N. Burnett

WEST TORONTO DENTAL SOCIETY

DR. V. STEWART WILSON
President

Under the capable leadership of their officers, the West Toronto Dental Society has arranged the following meetings to be held at Hunt's, Keele and Dundas Streets.

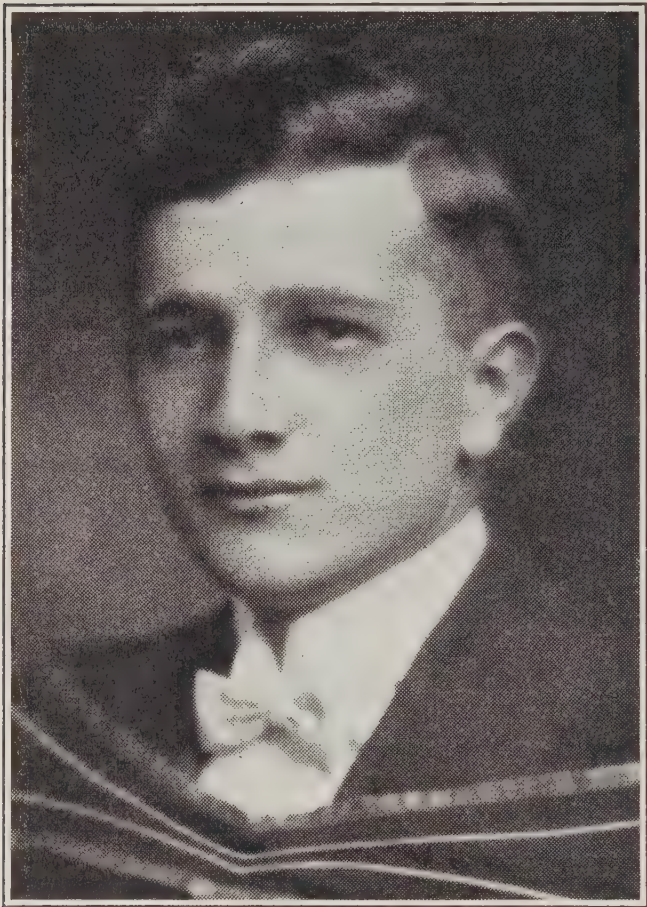

Monday, November 22, 1937	8.15 p.m.
Tuesday, January 18, 1938	8.15 p.m.
Wednesday, February 16, 1938	8.15 p.m.
Thursday, March 24, 1938	8.15 p.m.

A Bowling League is sponsored which meets at the Roseland Alleys each Wednesday at 1.30 p.m. All West End Dentists are invited to join the society and partake of the benefits derived from these meetings.

OFFICERS FOR THE SEASON 1937-38

President	V. S. Wilson
Past President	R. P. Lowery
Vice President	C. H. Avery
Secretary-Treasurer	A. C. Blackwell
Councillors	Elmer Hackett
	E. S. Aitken
	H. S. Percival
	Wesley Philp
Councillor to Academy	Victor H. Large

MT. SINAI DENTAL SOCIETY

SAMUEL W. LESLIE, M.D., D.D.S.
President

The session of 1937-38 marks the eleventh year of our existence as an organization. Our active membership is made up of about eighty per cent of the dentists eligible to belong.

To the Academy of Dentistry and the component societies we extend our whole-hearted co-operation in solving problems which may arise during the year. An invitation is hereby extended to all Members of the Academy to attend our regular monthly meetings.

As in the past our programme will follow along academic lines. Problems of economic importance to dentists will receive our consideration. Social activities will not be neglected.

We hope that the successful sessions of the past years will be repeated this season. With this aim in view the executive invites the co-operation of all active and prospective members. As the success of any organization depends in the main on the carrying out of ideas and suggestions by its membership.

The Executive for this year is made up as follows:

- Past PresidentDr. B. D. Garfield
- PresidentDr. S. W. Leslie
- Vice PresidentDr. H. M. Jolley
- Secretary TreasurerDr. R. Sidenberg
- Chairman of Clinic CommitteeDr. H. Landsberg
- Members without PortfolioDr. H. Rivkin
-Dr. S. Berrin

THE LADIES' AUXILIARY
To
THE ACADEMY OF DENTISTRY

51

MRS. E. C. VEITCH
President

Again, on September the 24th we begin a new term of activities in the Ladies' Auxiliary.

We are determined to launch out from our present membership of one hundred to a proposed membership of two hundred by our fifth anniversary in November.

Academy member! We need your wife, mother or sister, to help us be of greater service to your cause, and to ours.

We assure our new members a hearty welcome, and predict many warm friendships and happy associations for them, in our organization.

We are glad to have this opportunity to convey our sincere thanks to the Academy Members for the kindly support, given to our various efforts during the past year, as in previous years, and we are hopeful and confident of a continued fine co-operation.

The executive is planing a very interesting and profitable group of meetings for the coming season; our opening event will be a luncheon bridge at Scarboro Golf Club on Friday, September 24th at 1 p.m.

EXECUTIVE FOR 1937-38

Past President	Mrs. Ross Thomas
President	Mrs. Ernest C. Veitch
First Vice President	Mrs. J. W. McDonald
Second Vice President	Mrs. R. W. Hoffman
Secretary	Mrs. L. D. Drewbrook
Treasurer	Mrs. S. A. Milburn
Councillors	Mrs. L. F. Krueger
	Mrs. C. L. Eaton
	Mrs. Charles McLean
	Mrs. W. R. Hendry
	Mrs. L. Schumacher
	Mrs. Harvey Reid

AFFILIATED GROUPS

PROMOTION OF CHILDRENS' DENTISTRY

At the closing session on May 20th, 1937 of Dr. Sweet's Study Group for Dentistry for children, it was unanimously decided that a local branch be formed of the American Society for the Promotion of Children's Dentistry.

Dr. E. A. Grant was elected President and Dr. William K. Prendergast Secretary.

THE TORONTO SOCIETY OF DENTAL ORAL SURGEONS

The Toronto Society of Dental Oral Surgeons was organized in 1935 for the purpose of discussing subjects of special interest to exodontists, and promoting good fellowship between the members of our specialty. The president and secretary for the first season were Drs. E. W. Paul and W. J. Kerr, and for the second season, just concluded, Drs. W. L. Chalmers and Murray Robb. There are about a dozen exodontists enrolled.

The group has dinner meetings in Hart House about three or four times a year and at each meeting one of the members has given a paper or led a discussion on some particular problem. Up to the present time speakers have been: Drs. Chalmers, Crich, Jarman, Paul, Kerr and Johnson.

TORONTO ORTHODONTIC STUDY CLUB

Dr. Harvey Bean was responsible for the formation of The Toronto Orthodontic Study Club ten years ago, with its objective the collection of case data and the study of orthodontics. It holds four meetings each year, and acts as a clearing house for orthodontic thought. Discussion and even argument is full and free.

Enthusiasm over the future of the club is high, and in a few years, data, which is being collected now, may well prove to be a valuable contribution to orthodontic and medical knowledge.

Dr. Charles A. Corrigan is this year's President.

**TORONTO AND DISTRICT DENTAL GOLF
ASSOCIATION**

In 1921 a number of Golf enthusiasts formed the Toronto and District Dental Golf Association. Since that time this organization has flourished and has been the means of a lot of fun and the formation of many friendships among its members.

A spring and fall tournament is held each year and all Dentists who enjoy golf are invited to attend. The next Tournament will be held at the Burlington Golf & Country Club on September 15, 1937, and anyone wishing information should communicate with one of the following officers:

President	R. W. Hoffman
Vice-President	W. D. Clark, Hamilton
Secretary-Treasurer	P. G. Anderson
Handicap Committee	R. S. Woollatt

TORONTO DENTAL ASSISTANTS ASSOCIATION

The executive of Toronto Chapter of Ontario Dental Nurses' and Assistants' Association are looking forward to a year of intensive effort for increased membership, and thus, interest for the work of our Association.

To all who are not already one of us, we extend a hearty invitation to join us in our meetings, which are social and instructive. Good Fellowship is our Keynote.

Officers for the year are the following:

President	Miss M. G. Wiggins, Reg. N.
Vice-President	Miss E. B. Tuck
Corresponding Secretary	Miss Edna Boynton
Recording Secretary	Miss Eillen Freear
Treasurer	Miss M. Parrott

Convenor of Committees:

Membership	Miss Helen Campbell
Social	Miss Madge Buik
Welfare	Miss Phyllis Sandham

THE TORONTO DENTAL NURSES' ALUMNAE ASSOCIATION

This is an alumnae association of graduate nurses from the Royal College of Dental Surgeons. The following are the officers:

President	Miss Nan Braidwood
Vice-President	Miss Dorothy Collett
Treasurer	Miss Eleanor Crerar
Recording Secretary	Miss Nedra Groves
Corresponding Secretary	Miss Phyllis Sandham
Asst. Cor. Secretary	Miss Marjory Joyner
Social Convenor	Miss E. Grace Singer
Membership Convenor	Miss Marguerite Alexander
Visiting Convenor	Miss Eva Tutt

THIRTEENTH ANNUAL FALL CLINIC

Under the Auspices of
MONTREAL DENTAL CLUB

Mount Royal Hotel

September 22-24, 1937

The arrangements for the above meeting are rapidly nearing completion. The provisional program is as follows:

"Practical Bio Mechanics for Unfavourable Complete Denture Cases" — Dr. Arthur P. Little, Richmond, Va.

"The Problems of Parallelism, Retention and Assemblage in Fixed Bridge Restorations" — Dr. Karl W. Knapp, New York City.

"Operative Dentistry Failures Due to Improper Use of Anaesthesia" — Dr. Leroy L. Hartman, Columbia University.

"Porcelain Jacket Crowns and Porcelain Bridges" — Dr. William A. Squires, New York City.

"A Code for Dental Silicates" — Dr. Harold E. Tingley, Boston, Mass.

"Phonetics in Dentistry" — Dr. W. K. Prendergast, Toronto, Can.

Topic discussions on Full Dentures, Fixed Restorations, Porcelain Preparations and Local Anaesthesia led by the program clinicians.

Table Clinics, a series of some twenty clinics on all phases of dentistry presented by local dentists.

Post Graduate Course by Dr. Karl W. Knapp on the various phases of Mouth Rehabilitation, from 4 to 6 p.m., September 22, 23 and 24. The fee for this course is ten dollars and as the membership is strictly limited, applications accompanied by cheque should be forwarded immediately to the Treasurer.

Membership reservations for the 13th Fall Clinic are now being accepted by the Treasurer, Dr. F. A. Edward, 910 Medical Arts Bldg., Montreal, Canada.

Fee to non-residents is Five Dollars including two luncheons.

Dr. J. K. Carver,
Chairman, Publicity Committee,
394 Victoria Ave., Westmount, Que.

March 2—Clinician—J. Oppie McCall, Subject—"Preventive Dentistry".

April—Closing Night. Stag.

ONTARIO DENTAL ASSOCIATION

DR. R. SIDNEY WOOLLATT

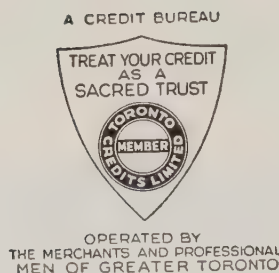

President

On behalf of all members of the Ontario Dental Association I bring greetings and very best wishes to the Toronto Academy of Dentistry. A very friendly spirit of co-operation has always existed between these sister societies. It is not necessary to point out the splendid record of the Academy. I offer hearty congratulations and can assure all our members that under the able leadership of Dr. Harvey Reid the Academy will continue to grow in all its branches.

Many men think that they can make good progress simply by keeping up a programme of reading, but to the majority of us, wisdom comes through human fellowships. I urge all members of the Ontario Dental Association within a reasonable distance of Toronto to take advantage of this opportunity.

Our profession has recently met with a great loss in the death of Wallace Seccombe, Albert E. Webster and C. Angus Kennedy. These men have left their names indelibly stamped on the profession of their choice. The world has need of men of this type. As Dr. C. N. Johnson has said: "All honour to the men who had a vision of what a dental education was to be. Their fame grows greater as the years recede, and a pleasant halo of memory surrounds them whenever their names are mentioned."

R. SIDNEY WOOLLATT.

ARE YOUR PATIENTS ENTITLED TO CREDIT?

From an analysis made of professional accounts in different centres, it has been definitely ascertained that "One-fifth of Dentists' incomes is lost to 'Dead Beats'." This loss can be substantially reduced by obtaining a credit report from the Bureau.

The information on the paying habits of the people in the city which has been accumulated by the Toronto Credit Bureau during the past eight years is available to the professional members. This trade record, including accounts placed for collection by over 500 professional men, is furnished by telephone at fifty cents per call, or a complete written report covering antecedents, resources, income and general reputation at \$1.00 within the city limits, and \$1.25 elsewhere.

An efficient department for the collection of accounts is also maintained.

COLLECTION DEPARTMENT RATES

No Collection — No Charge

Accounts over \$10.00	25%
Accounts of \$10.00 and under	33 $\frac{1}{3}$ %

Accounts of debtors who are not at the address given and whose whereabouts can only be ascertained through the employment of our Tracing Department, collections made in instalments of \$5.00 or under and those effected through process of law33 $\frac{1}{3}$ %

Legal action undertaken only when authorized by Member, who must advance court costs, and if settlement is not effected court costs only will be charged.

Above rates apply to Greater Toronto only. Rates on out-of-town collections are governed by the rate of our agents, which will not exceed 33 $\frac{1}{3}$ %, to which we add our forwarding charge of 5%.

We will be pleased to have a representative call and discuss our services, without obligation to you. Just telephone us.

C. N. JOHNSON, D.D.S., LL.D., F.A.C.D.
Chicago, Ill.

CHARLES NELSON JOHNSON, M.A., D.D.S., M.D.S., F.A.C.D., LL.D.

By Arnold D. Mason, D.D.S., F.A.C.D.

In presenting Dr. Johnson with a life membership in the Academy of Dentistry, Toronto, we have not only bestowed an honour on Dr. Johnson but the Academy is also honoured. Dr. Johnson always adds grace and distinction to any organization with which he may be associated.

Charles Nelson Johnson was born in Brock Township, County of Ontario, and received his early education in the Province of Ontario. In the spring of 1881 he graduated from the Royal College of Dental Surgeons of Ontario, and until 1884 practised in the town of Collingwood. One year later, after attending a session at the Chicago College of Dental Surgery, he graduated and commenced practice in that city, where he still retains an office so that he may attend to a few of his favoured clientele. In 1886 he was appointed to teach Operative Dentistry at the Chicago College and is at present Professor of this subject in that institution, as well as Dean of Students.

If these had been his only achievements, he could have considered his life a success. His inexhaustible energy has made him capable of not only conducting an extensive dental practice for many years, but in addition to this he has been a teacher of exceptional merit, a prodigious writer of books and innumerable articles on dentistry as well as fiction and poetry, and one wonders how it was possible for such a comprehensive programme. And yet he remains one of God's modest gentlemen, loved by hundreds of his confreres who lay claim to his friendship. I do not believe that I am over-estimating Dr. Johnson's worth, when I say that he has had as much influence in forming the trend of dental thought on this continent as any other single individual. As a correspondent he puts us all to shame. The way he answers his great quantity of mail in his own handwriting is amazing.

He has served organized dentistry with a whole-hearted devotion, having held the Presidency of the following: the Odontological Society of Chicago, the Odontographic Society of Chicago, the Chicago Dental Society, the Illinois State Dental Society, and the American Dental Association. For upwards of twenty-five years he was editor of the Dental Review and has been editor of the Journal of the American Dental Association from 1925 to the present time. For years Canadian readers of "Oral Health" have looked forward with pleasure to his monthly contributions.

But with all his attainments, the strength of this man is in his lovable character, his true friendship and his sound counsel. Truly, Canadians in all walks of life should be proud of this son of Canada who has accomplished so much and brought such honour to his native land.

In honouring Dr. Johnson, the Academy is following the precedent set by the Board of Directors of the Royal College of Dental Surgeons of Ontario and the University of Toronto. In 1921 the former awarded him the title of Master of Dental Surgery, and during the joint meeting of the British and Canadian Dental Associations held in Toronto in 1934, the latter conferred on him the degree of Doctor of Laws, *honoris causa*, the highest honour that the University of Toronto can give.

May Dr. Johnson be spared many years to enjoy his various activities and the honours bestowed upon him which were so richly deserved.

SECRETARY'S REPORT FOR THE YEAR 1936-37

Time flies and—business is business. Therefore, records must be kept and it is my duty, as secretary of the Academy of Dentistry, for the year 1936-37, to outline the proceedings of the organization, in a brief and comprehensive manner.

The five District societies functioned, very satisfactorily, most of them enjoying their second year of good fellowship and Dental Education. Most of the Associations developed permanent meeting places and stated times. Social gatherings helped a great deal to get the practitioners in the Districts to become better acquainted and have a kindlier feeling for their neighbors, in the profession.

Volume 3. of the Academy Bulletin appeared in a new garb and was received, most enthusiastically, by the profession and much praise is due Dr. Charles McLean and his committee, for the splendid publication that was placed in the hands of the Dental Profession.

The "Good Fellowship" night, held at Eglinton Hunt Club, on October 2nd 1936, was new, lively and a huge success with 200 dentists of Toronto and district present. Much praise is due Harvey Reid and his committee for a most enjoyable evening with members of our chosen profession.

The First stated meeting and Annual Dinner was held at Eaton's Round Room on October 26nd 1936. C. N. Johnson, D.D.S. L.L.D. Chicago, ILL. a good old friend of Dentistry, delivered a splendid address to 300 members and friends of the Dental Profession.

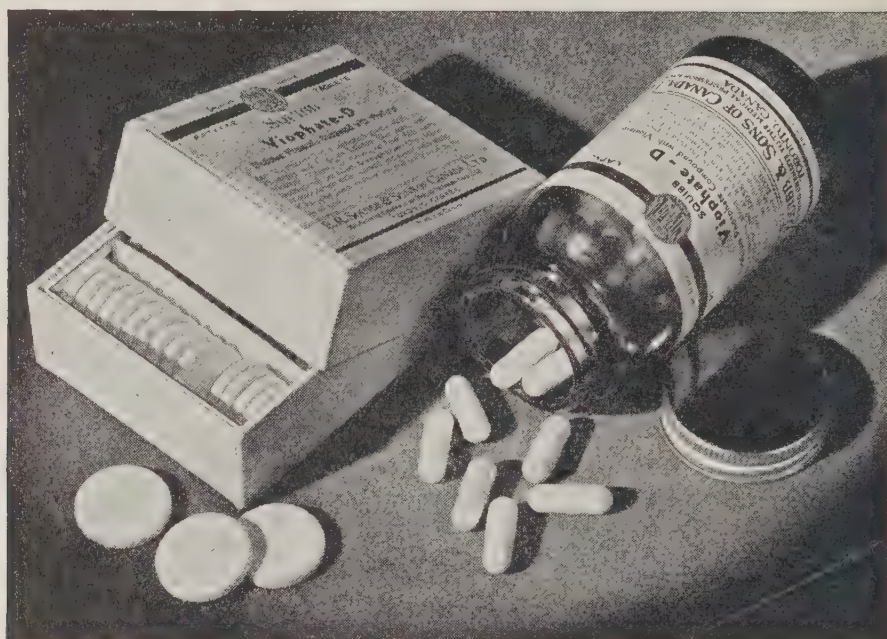

A Special Meeting was held at Osler Hall, on November 3rd 1936, when Dr. F. M. Lott M.Sc. (Dent.) gave a very instructive lecture on "Glass as a Denture Base", illustrated by slides and Dentures made from that material. He was presented with a cane by the members of his class, 2T3, as a token of their esteem, of his efforts in Dental Research.

The Second Stated meeting was held at Osler Hall on November 18th 1936, and was under the auspices of the Public Dental Health Committee, and the speaker was Walter Emerson Briggs, D.D.S. Attleboro, Mass. His subject was "Preventive Dentistry and Visual Education". The radio talk, and, having the Public Welfare workers as guests, aroused a good deal of interest in the subject of Public Dental Health.

President Elect's Night, under the able leadership of Dr. Harvey Reid, was held at the King Edward Hotel with two Clinic periods, 4 p.m. and 2 p.m. and a well assorted group of clinicians. The members found that the hotel offered much better facilities for this type of meeting and the evening proved a great success, both educationally and socially.

The Third Stated meeting was held on January 14th 1937, with Dr. Bert L. Hooper, Lincoln, Neb. being the guest speaker. In the afternoon his subject was "Immediate Denture Technique", and in the evening he spoke on "Art in Prosthetic Dentistry". His slides were masterpieces in the art of photography and Dr. Hooper proved that he was a hobbyist as well as a Prosthetic specialist.

The Ladies' Night and Annual Dance was held in Eaton's Round Room and Auditorium on January 29th 1937, under the able chairmanship of Dr. W. Trelford. It was a grand success with 345 Dentists, their wives and friends, present. After an excellent dinner the guests were entertained at bridge, dancing and a Fashion Show, supplied by the At Home committee.

The Importance of Calcium in Orthodontic procedure should not be overlooked.

It is generally accepted that the application of mechanical force to accomplish tooth movement and bone expansion should be accompanied by an ample supply of calcium and phosphorus in the body to provide for the increased bone formation. Since children's appetites are often capricious, their diet may be deficient in calcium. The addition of a dietary supplement, such as Viophate-D with Viosterol Squibb, may therefore be advisable when orthodontic work is being done.

Viophate-D with Viosterol Squibb provides calcium and phosphorus in

proper ratio and sufficient Vitamin D to insure absorption and utilization of these minerals. It is supplied in both tablets and capsule form.

Each tablet supplies the equivalent of 2.6 gr. calcium, 1.6 gr. phosphorus and 660 units of Vitamin D (International Units). Supplied in boxes of 51 tablets. Two capsules are equivalent to one tablet. They are available in bottles of 100.

Children enjoy taking the pleasant wintergreen-flavored tablets. Capsules are useful as a change from tablets.

E·R·SQUIBB & SONS OF CANADA, Ltd.
MANUFACTURING CHEMISTS TO THE MEDICAL PROFESSION SINCE 1858

The Past Presidents' and Fraternal Night, with Dr. W. J. Kerr in the chair was held on February 10th, 1937. The essayist was Dr. Roger E. McMahon and his subject was, "Pre-operative and Post-operative Procedure and the Extraction of Vital and Non-Vital Teeth". A dinner in honour of Past Presidents and our guests from Montreal, was held at the Granite Club. A lively discussion took place after Dr. McMahon's paper, at Osler Hall.

The Fourth Stated meeting was held at Osler Hall, March, 11th 1937, and the essayist was Dr. O. W. Silberhorn, Chicago, ILL. His paper on "Modern Development in Fixed Bridge Work", illustrated with slides, was very clear and instructive. The members gained many points from the evening's discussion.

On April 26th 1937, the Public Health committee gave the members of the Academy, a resume of their years work, especially the Dental survey which had just been completed. The speakers were Drs. V. Fisk, Chairman, A. E. Higgins, E. T. Guest, T. R. Marshall and others. This Committee deserves the highest praise from the Academy Of Dentistry, for their untiring efforts, gratifying results and fact findings, during the past year. The Public Dental Clinic on Nassau St. conducted, jointly, by this Academy and the Departments of Welfare and Health of this city, reports, in the following table, the services for 1936.

It is interesting to note that 1064 people have had their dental services completed and placed in a condition of good dental health within the year. This would seem to indicate a generous contribution to the health of the unemployed, in our city, by the dental profession.

Patients referred to private dentists for Extraction and Repair	
Dentures	2776
Patients referred to Hospital Clinics for Multiple Extractions	625
Full Dentures required	640
Amalgams, Silicates and Cements	2508
Treatments including prophylaxis	876
Dentures completed	600
Dentures Remade	52
Patients completed	1064
Patients visits to Clinic	7326
New Patients	2990
One Hundred and Eighty-Seven Dentists gave 353½ days voluntary service.	

One Hundred and Thirty-Six Dentists made 600 dentures and 52 re-makes.

That portion of appropriation ear-marked for bridge repairs, rebasing dentures and denture repairs has provided a valuable service to a number of unfortunate people. Broken facings were replaced, recently extracted teeth added to patients' dentures, ill-fitting dentures made comfortable and useful. In this way many people were made fit for employment, both in health and appearance, at small cost. This service, of course, was supplementary to that provided by the Province, which only cared for simple denture repairs.

In conclusion, I wish to congratulate the President, Dr. S. S. Crouch, upon a very successful and harmonious year, in which the members were privileged to enjoy a well rounded program. His punctuality, sane judgment, tact and experience won, for him, the best efforts and co-operation of all the officers, committees and the Fellows.

All of which is respectfully submitted.

HAROLD W. HOAG,

Secretary, 1936-37.

EDITORIAL

It is hoped that you have enjoyed and profited by this the fourth edition of "The Bulletin" of the Toronto Academy of Dentistry.

Your editorial committee trusts you will make this bulletin a reference book with regard to all Dental activities in the city of Toronto.

A new innovation is the Dental calender found on the following page and you are asked to refer to this in arranging any Dental activity so that there may be no conflicting meetings.

We appreciate the co-operation of the many firms whose advertisements appear on these pages and who have made it financially possible for the Academy to publish "The Bulletin". You are asked to reciprocate with your patronage.

We voice the feelings of the Executive Council in wishing all Fellows of the Academy of Dentistry a happy and prosperous season in their chosen profession.

R. W. HOFFMANEDITOR,
W. J. KerrBusiness Manager.

DENTISTS RECOMMEND THE BEST

Regardless of all other considerations, members of the dental profession advise their patients to use the best dental health and mouth beauty preparations. As manufacturers we are certain that these

CHALLIES SPECIAL PRESCRIPTION PRODUCTS

will meet the requirements

THE LIQUID DENTIFRICE as a cleansing and polishing agent with detergent, oxidizing, detoxifying and absorption properties, which enters pockets, lubricates the brush and forms a protective film on clean teeth and gums.

THE DENTAL POWDER—An economical, efficient agent, which helps to ensure healthy teeth and gums, mouth beauty and fragrant breath.

SANORA—The everready tooth polish and massage.

HAND MADE BRUSHES OF BEST QUALITY — Bristles firmly secured by hand wire drawing.

MOUTH HEALTH AND BEAUTY KIT—Contains brush with powder for morning use, a liquid for night protection and a cream for general use, also a handy dental mirror.

THE IDEAL COMBINATION TREATMENT **for the RELIEF OF PAIN**

The combined use of POLORIS DENTAL POULTICE and POLORIS POULTICE results in the overthrow of that insidious enemy of every dentist's reputation and success — PAIN.

POLORIS DENTAL POULTICE is a proved formula originated 22 years ago and whose efficacy is internationally recognized.

POLORIS TABLETS are the answer to dentists' demand for a superior and strictly ethical pain tablet not advertised to the public.

These two products, used and prescribed before and after all instrumentation, constitute the IDEAL COMBINATION TREATMENT for the relief of pain, nervous tension, and shock.

USED AND PRESCRIBED BY DENTISTS FOR 22 YEARS
